

Bright White Quartz

SCOTIA WHITE™

Black Bull Resources Inc.

POOL PLASTER

Introducing Scotia White™ Quartz

Scotia White™ quartz is one of the whitest, brightest, and purest quartzes on the market today, and it is exclusively available from Black Bull Resources Inc.

Black Bull is a publicly traded (TSX-V symbol: BBS) industrial minerals company based in Nova Scotia, Canada. Starting in late 2005, we are mining, processing and marketing silica-based minerals under the Scotia White™ brand from our White Rock Mine near Shelburne. Our mine boasts one of the largest reserves of white quartz in North America, enough to meet long-term demand from many markets. Our quartz has been measured at 97.4% pure SiO₂ before processing and more than 99% pure after processing.

This level of purity, combined with its angularity and its opaque white colour, makes Scotia White™ quartz the premium choice for a wide range of specialized applications. From landscaping stone and architectural pre-cast to countertops, terrazzo flooring, and golf course bunker sand, Scotia White™ will considerably enhance the appeal and performance of your project. It can also be delivered in a range of sizes – from large boulders to fine powders – created especially for specialty manufacturers and end users.

Black Bull Resources is guided by an executive team with extensive experience in industrial minerals. We are further leveraging the skills of our management by establishing a marketing partnership with US Silica Company to bring our Scotia White™ brand quartz to major markets throughout North America.

LANDSCAPE STONE

Scotia White™ - Elegance That Endures

Scotia White™ quartz is unmatched by any other industrial mineral when it comes to beauty combined with durability. Furthermore, it can be cost effective in the production process. With its opacity and whiteness, Scotia White™ has the potential to reduce the use of expensive pigments in colour formulations. In white formulations, the use of additional whiteners or coatings may not be required.

Beyond its beauty, Scotia White™ quartz adds strength and longevity to the products that use it, adding years to the lifetime of projects such as plaster-surfaced swimming pools. Our quartz has a hardness of 7 on Mohs' Scale, well beyond that found in softer minerals. It is highly recommended for use in wear

surfaces where it is better able to withstand the chemical and abrasion stress of day-to-day use than softer aggregates.

Scotia White™ has a pH factor of 6.8, making it inert in the presence of most acids. This is especially valuable in exterior applications where acid rain and other pollutants can reduce the lifetime of a surface or in swimming pools where acids required to treat the water can erode the surface.

ENGINEERED STONE

Available in a Variety of Standard Sizes or Custom Sizing

More than brilliant and durable, Scotia White™ is available in a variety of sizes – from large boulders to fine powder. This makes it the perfect choice for many commercial and residential applications – from countertops and flooring tiles to exterior walls and swimming pools.

We are also able to provide custom sizes or blends to specialty manufacturers by using different screen cuts, or by combining any of the cuts listed.

Standard sizes include:

- *Boulders*
- *1 1/2" stone*
- *1/2" – 1/4"*
- *1/4" – 6 mesh (US sieve)*
- *6 – 14 mesh*
- *14 – 20 mesh*
- *20 – 40 mesh*
- *40 – 140 mesh*
- *140 – 325 mesh*

EXTERIOR INSULATION &
FINISH SYSTEMS (EIFS)

Enhancing the Beauty and Performance of Your Application

Simply put, when you choose Scotia White™ quartz, you're choosing a high-calibre quartz product that greatly enhances the appearance and quality of your project or product application. Our quartz is ideal for:

- **Plastered swimming pools**
- **Engineered stone/decorative surfaces**
- **Exterior wall systems**
- **Landscaping**
- **Golf course bunker sand**
- **Aquarium stone**
- **Architectural pre-cast concrete**
- **Specialty flooring**
- **Stucco, plaster and grout**
- **Textured coatings**

BUNKER SAND

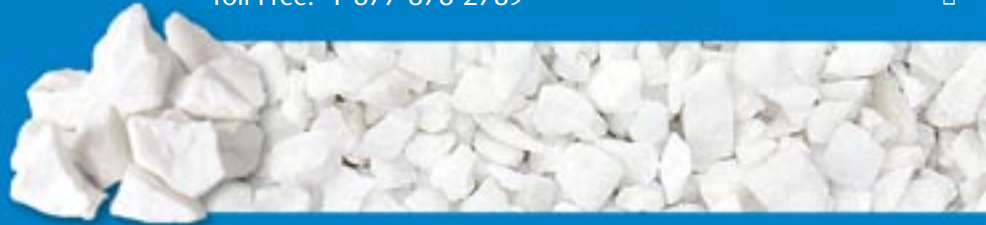

Here To There, and Anywhere

Just as we can provide nearly any size of Scotia White™ for a variety of applications, Black Bull Resources is able to serve all markets – national and international – thanks to our geographic location. Close to the St. Lawrence Seaway with water routes to the Great Lakes, our White Rock Mine has ready access to two deep-water, ice-free ports – Shelburne and Yarmouth, Nova Scotia. That means we can ship our products via ocean freighters to US and European markets, as well as making use of rail or truck transportation to North American markets.
